RIDHAM TANEJA

+91-9336026772 | ridham643@gmail.com | linkedin.com/in/ridham-taneja | github.com/DeemonDuck

SKILLS

Languages: Python

AI & ML: LangChain, RAG, Prompt Engineering, Multi-Agent Systems, XGBoost, LightGBM, AdaBoost, CNN, LSTM, BiLSTM, Attention Mechanisms

Frameworks & Libraries: FastAPI, Streamlit, Scikit-learn, TensorFlow, Keras, NumPy, Pandas, Matplotlib

Backend & Databases: SQL, REST APIs, FastAPI, Webhooks, Event-Driven Workflows, n8n, SQLite, ChromaDB, PostgreSQL

Deployment & DevOps: Docker, Hugging Face Spaces, Ollama, SMTP / Mail Servers, Git, GitHub, Jupyter Notebook

Concepts: Sequence Modelling, Class Imbalance Handling, Hyperparameter Tuning, DBMS, Cross-Validation, ROC-AUC, Precision-Recall, OOP

EXPERIENCE

Artificial Intelligence Engineer
August 2026 – Present

D2C Products and Services Limited, Noida

- Automated the company's end-to-end **NFC workflow** using **n8n**, replacing manual operational steps with event-driven orchestration across internal systems.
- Built an **AI content generation pipeline** that ingests public profile data from LinkedIn, Instagram, and X (Twitter) to automatically generate professional photos and bios.
- Delivered a **RAG-based chatbot** for a separate client-facing product and built the company's **mail server from scratch**, covering routing, delivery, and integration with existing services.

AI/ML Trainee & Project Intern | NASSCOM-affiliated program
October 2024 – September 2025

QMANSYS Infosolutions

- Engineered a multi-class emotion classification system on 111K samples, achieving **96% accuracy** using XGBoost and **94%** with LightGBM.
- Improved model performance using hyperparameter tuning, cross-validation, ROC-AUC, and Precision-Recall metrics, achieving **95% validation accuracy** before deployment via Streamlit for real-time inference.

PROJECTS

UPI Sentinel · GitHub | Live Demo ↗

- Developed a contextual fraud detection system using CNN + BiLSTM + Attention to model transaction sequences and capture temporal spending behaviour.
- Addressed extreme class imbalance in 1.2M+ digital payment transactions through class weighting and threshold optimisation, achieving **0.85 F1-score**, **0.99 ROC-AUC**, and **90% recall**.
- Built a real-time inference pipeline using FastAPI and Streamlit, **containerised with Docker** and deployed on **Hugging Face Spaces** for live sequence-aware fraud scoring and monitoring.

GuestFlow-AI · GitHub

- Built an event-driven hospitality workflow automation platform using FastAPI, Streamlit, and SQLite, with a real-time operations dashboard covering workflow visualisation, ticket generation, and analytics.
- Developed **a multi-agent orchestration system** that dynamically routes guest events across Pre-Stay, In-Stay, and Post-Stay workflows with escalation handling, VIP prioritisation, and persistent guest state management.
- Implemented **Retrieval-Augmented Generation (RAG)** with local LLM inference via Ollama (Phi-3), enabling context-aware guest query resolution using a hotel knowledge base.

EDUCATION

B.Tech – Computer Science & Engineering (AI & ML)
Sep 2022 – Present

Raj Kumar Goel Institute of Technology, Ghaziabad, Uttar Pradesh

CGPA: **7.0 / 10** | Class XII – CBSE **76%** (2021) | Class X – CBSE **82%** (2019)
