+91-9336026772 | ridham643@gmail.com | [linkedin.com/in/ridham-taneja](https://www.linkedin.com/in/ridham-taneja) | github.com/DeemonDuck | [Portfolio](#)

SKILLS

Languages: Python, JavaScript, SQL

Frontend: React, JSX, HTML, CSS, Vite, REST API Integration

Backend: FastAPI, REST APIs, JWT Authentication, Webhooks, Event-Driven Workflows, Pydantic

Databases: PostgreSQL, SQLite, Supabase, SQLAlchemy, ChromaDB

Auth & Cloud: Google OAuth, Supabase Auth, Render, Vercel, Hugging Face Spaces

DevOps & Tools: Docker, Git, GitHub, Chrome Extension APIs, PWA, Jupyter Notebook

AI/ML: LangChain, RAG, CNN, BiLSTM, Attention Mechanisms, XGBoost, LightGBM, Scikit-learn, TensorFlow

Concepts: DBMS, OOP, System Design Basics, Sequence Modelling, Class Imbalance Handling

PROJECTS

ApplyBoard — Job Application Tracker · [GitHub](#) | [Live Demo ↗](#)

- Built a full-stack job application tracker with a FastAPI + PostgreSQL backend and a React dashboard, deployed independently on Render and Vercel.
- Implemented Google OAuth via Supabase Auth with JWT-based, per-user data isolation, ensuring each user's applications remain private and access-controlled.
- Engineered a Chrome/Edge browser extension with site-specific content scripts (LinkedIn, Naukri, Internshala, Indeed) that auto-captures job details using message-passing between content and popup scripts.

UPI Sentinel · [GitHub](#) | [Live Demo ↗](#)

- Developed a contextual fraud detection system using CNN + BiLSTM + Attention to model transaction sequences and capture temporal spending behaviour.
- Addressed extreme class imbalance in 1.2M+ digital payment transactions through class weighting and threshold optimisation, achieving **0.85 F1-score**, **0.99 ROC-AUC**, and **90% recall**.
- Built a real-time inference pipeline using FastAPI and Streamlit, enabling sequence-aware fraud scoring through REST APIs and an interactive monitoring dashboard.
- Containerised and deployed the complete application using Docker and Hugging Face Spaces, making the system publicly accessible for live demonstrations and evaluation.

EXPERIENCE

AI/ML Trainee & Project Intern

October 2024 – September 2025

[QMANSYS INFOSOLUTIONS](#) (in association with [NASSCOM](#))

- Participated in an industry-oriented AI/ML training and project collaboration program involving practical implementation tasks and real-world technical assignments.
- Engineered a multi-class emotion classification system on 111K samples, achieving **96% accuracy** using XGBoost and **94%** with LightGBM.
- Improved model performance using hyperparameter tuning, cross-validation, ROC-AUC, and Precision-Recall metrics, achieving **95% validation accuracy** before deployment via Streamlit for real-time inference.

EDUCATION

B.Tech – Computer Science & Engineering (AI & ML)

Sep 2022 – Present

[Raj Kumar Goel Institute of Technology, Ghaziabad, Uttar Pradesh](#)

CGPA: **7.23 / 10**

Class 12 — CBSE Board

July 2021

[Harmilap Mission School, Kanpur, Uttar Pradesh](#)

Percentage: **76%**

Class 10 — CBSE Board

July 2019

[St. Xavier's High School, Vapi, Gujarat](#)

Percentage: **82%**
